Software Developer | Associate Programmer Analyst

Fargo, ND | jackson.satermo@gmail.com | jacksonsatermo.com | linkedin.com/in/jackson-satermo

PROFILE

Software developer and Associate Programmer Analyst with a B.S. in Computer Science and hands-on experience building, enhancing, testing, and supporting enterprise applications. Strong in Oracle SQL, PeopleCode, JavaScript/TypeScript, HTML/CSS, debugging, and application integrations. Experienced translating business needs into reliable technical solutions, troubleshooting root causes, and collaborating with technical and non-technical teams. Building modern web and mobile products independently through jacksonsatermo.com.

TECHNICAL SKILLS

Languages: Java, JavaScript/TypeScript, SQL, PeopleCode, Python, HTML/CSS
Frameworks & Web: React, Django, Node.js, REST APIs, Web Services
Databases: Oracle, PostgreSQL, SQL Server, MySQL
Tools & Platforms: PeopleSoft/PeopleTools, Application Designer, Application Engine, Oracle SQL Developer, Git, Visual Studio / VS Code
Engineering: Object-Oriented Programming, SDLC, Debugging, Testing/QA, Data Modeling, Technical Documentation

EXPERIENCE

Associate Programmer Analyst | North Dakota University System (NDUS) **Fargo, ND | 2026–Present**

- Develop and support PeopleSoft Campus Solutions enhancements using PeopleCode, Application Engine, Application Designer, and Oracle SQL across enterprise production systems.
- Write and troubleshoot complex SQL queries and views, validate data, and translate business requirements into tested application changes.
- Contribute to frontend modernization and usability improvements using HTML, CSS, JavaScript, and PeopleSoft Fluid technologies.
- Work across the full application lifecycle in Dev, Test, Stage, and Production, including analysis, coding, testing, documentation, deployment support, and root-cause troubleshooting.
- Partner with business analysts and developers to clarify requirements, communicate technical findings, and deliver maintainable solutions.

Helpdesk Technician | 702 Communications **Moorhead, MN | 2025**

- Resolved escalated internet, networking, and VoIP issues in an ISP environment using systematic troubleshooting across DNS, DHCP, TCP/IP, NAT, Wi-Fi, routers, and customer-premises equipment.
- Collaborated across support, provisioning, and field teams and created internal documentation to improve repeatable troubleshooting and knowledge sharing.

Consultation Agent | Geek Squad, Best Buy **Fargo, ND | 2022–2024**

- Delivered customer-facing technical support and translated complex hardware, software, and device issues into clear, practical solutions.

SELECTED PROJECTS

AI Resume Matcher — NDSU Capstone | Team Project

- Built a full-stack recruiting application that scored and summarized candidate resumes using a React-based interface, backend services, PostgreSQL, and the OpenAI API.

Many Rooms — Full-Stack Web & Mobile Platform | In Development

- Designing a church community management product for groups, events, scheduling, communication, and administrative workflows; featured as an active product concept on jacksonsatermo.com.

EDUCATION

Bachelor of Science in Computer Science | North Dakota State University **May 2025**
